Moonbloom Labs

What we build

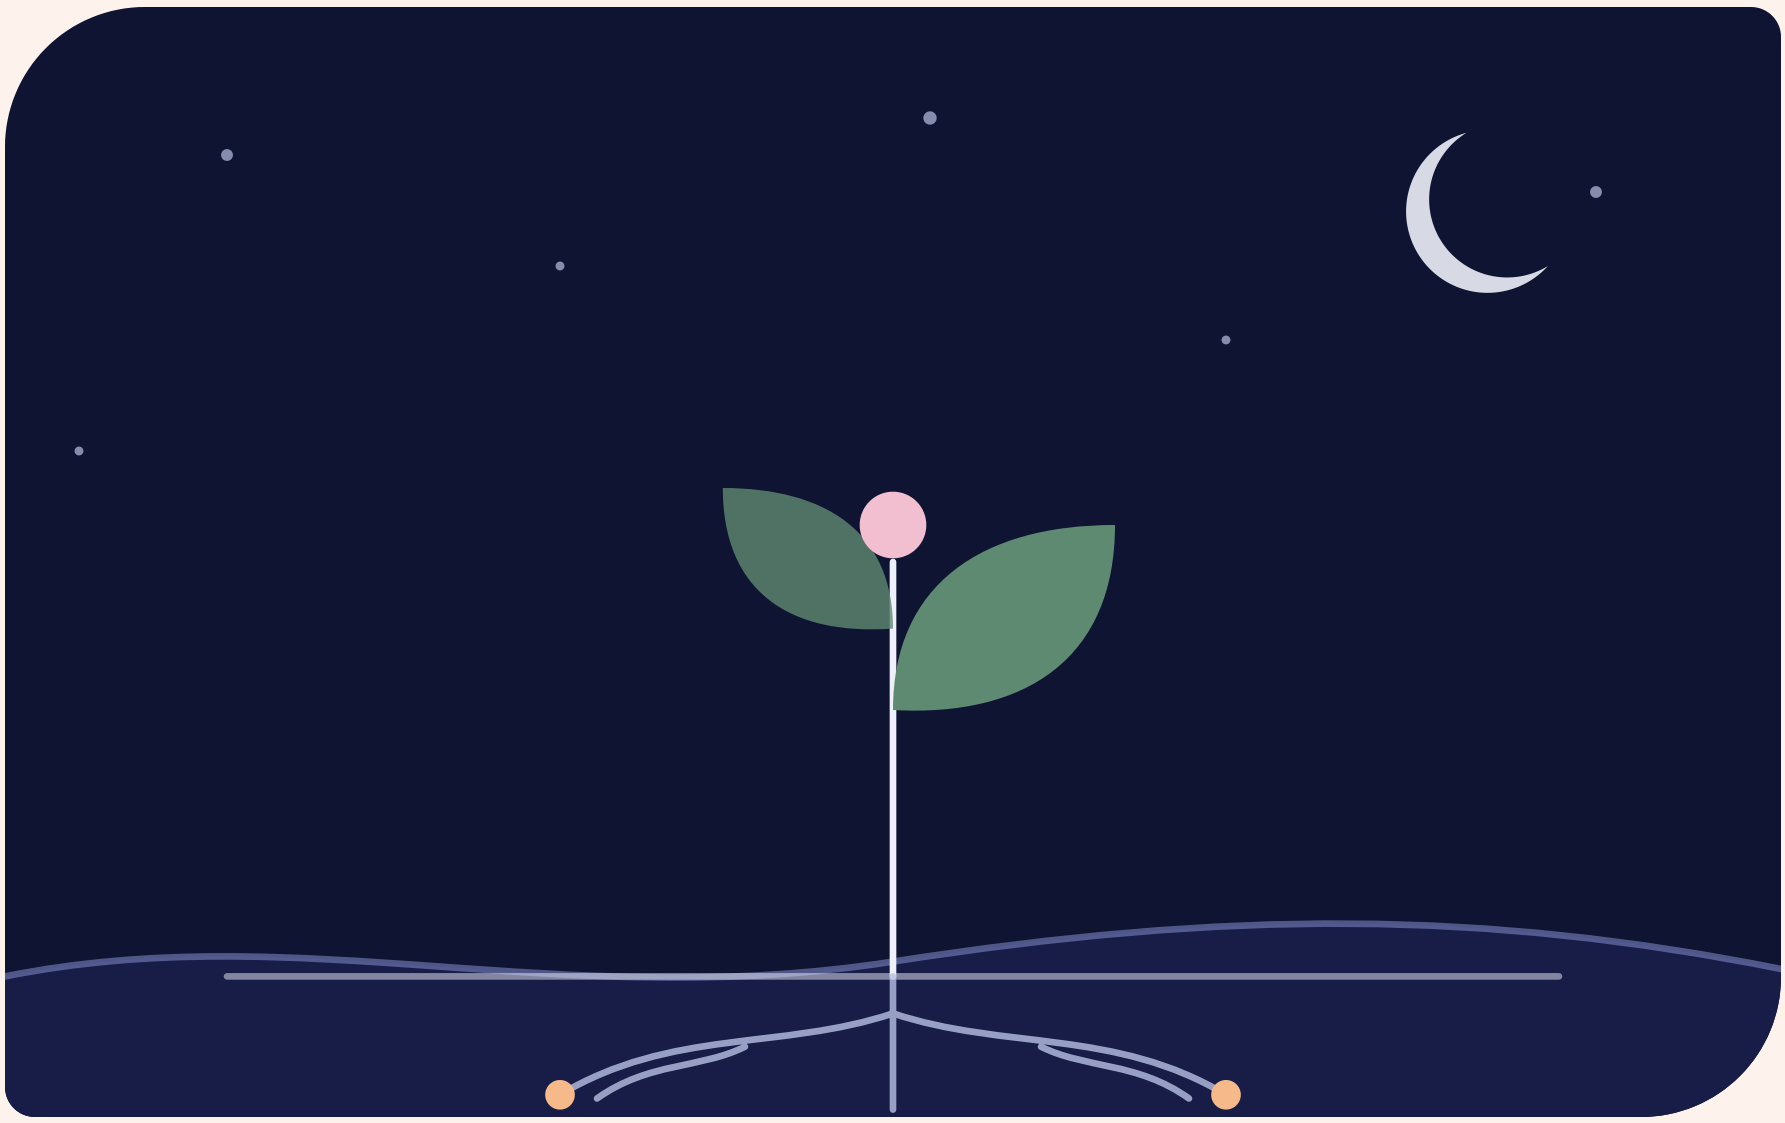

Six areas where an overnight prototype answers the question that matters first: does this idea work?

RAG & AI search

Ask your company documents questions and get answers with citations to the source.

moonbloomlabs.com/services/rag-ai-search/

Knowledge management

Turn scattered docs, wikis and chats into one searchable, maintained knowledge base.

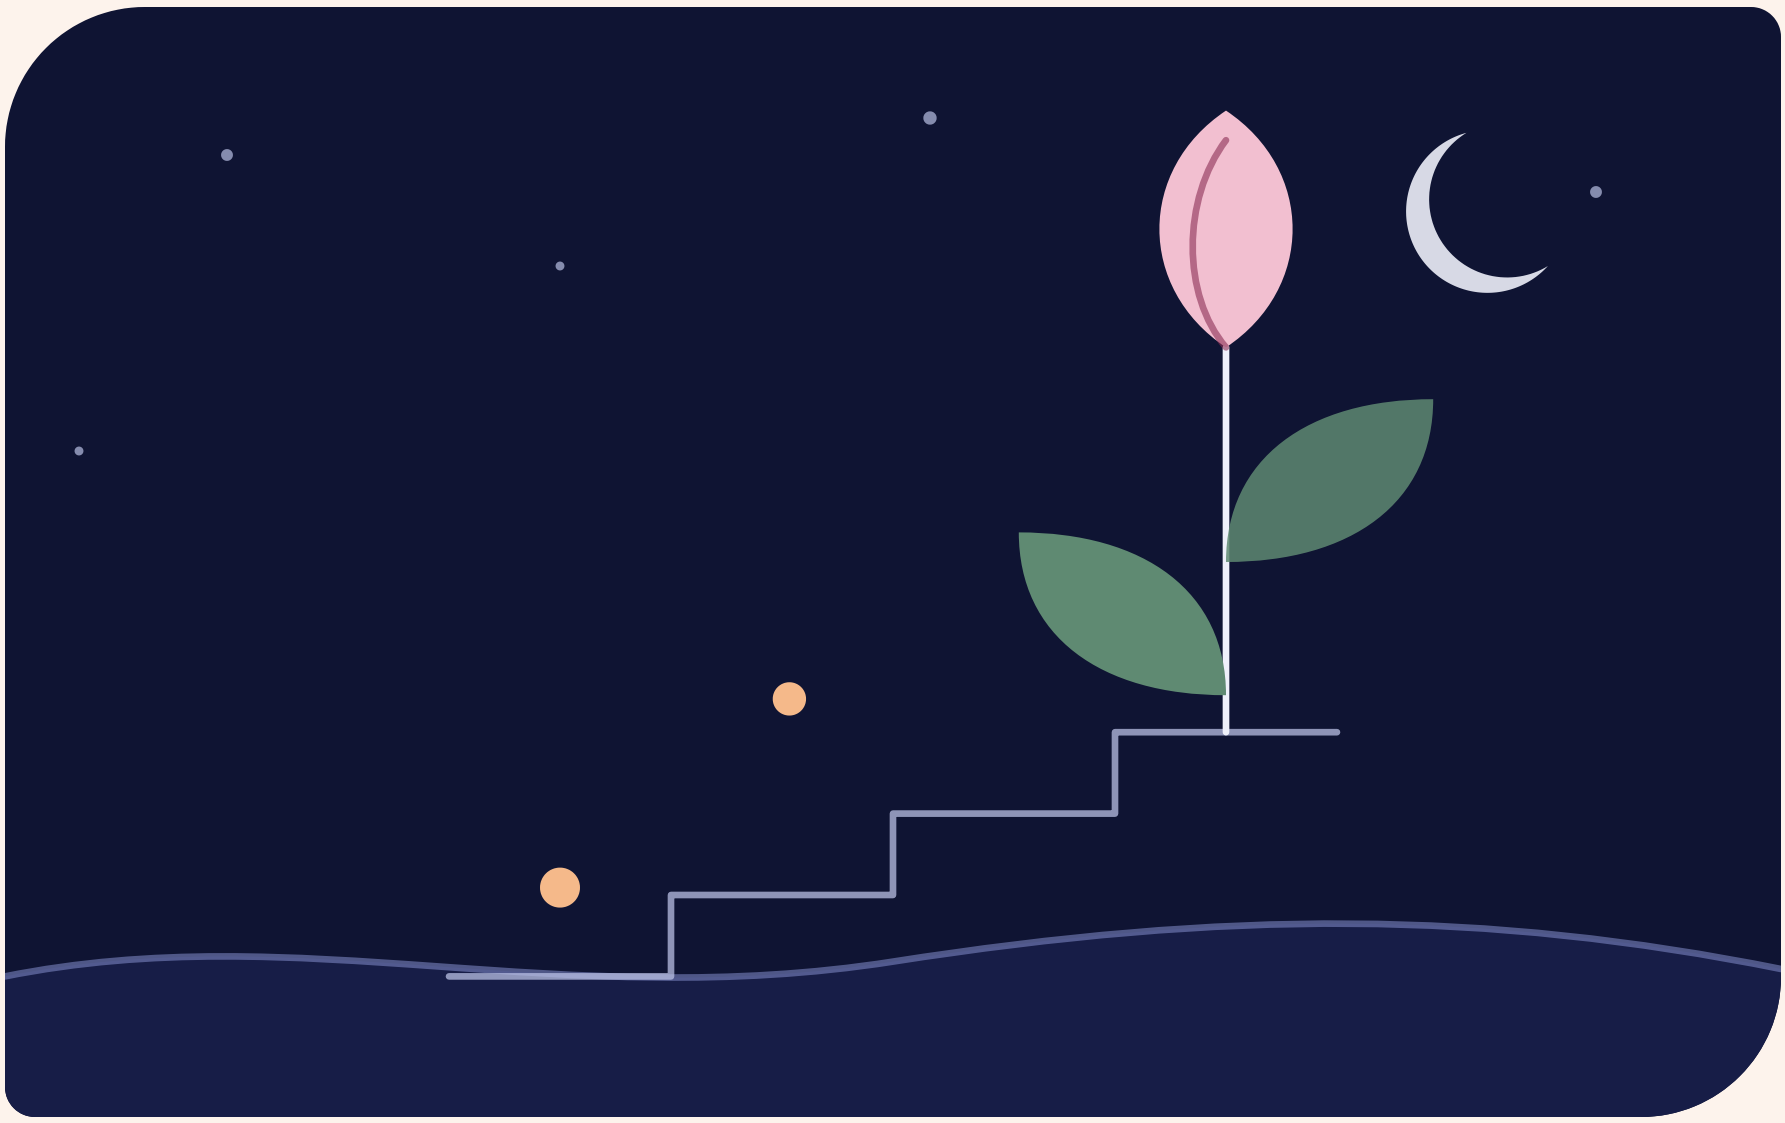

moonbloomlabs.com/services/knowledge-management/

Chatbots & AI assistants

Assistants for customer support, an internal helpdesk or onboarding new colleagues.

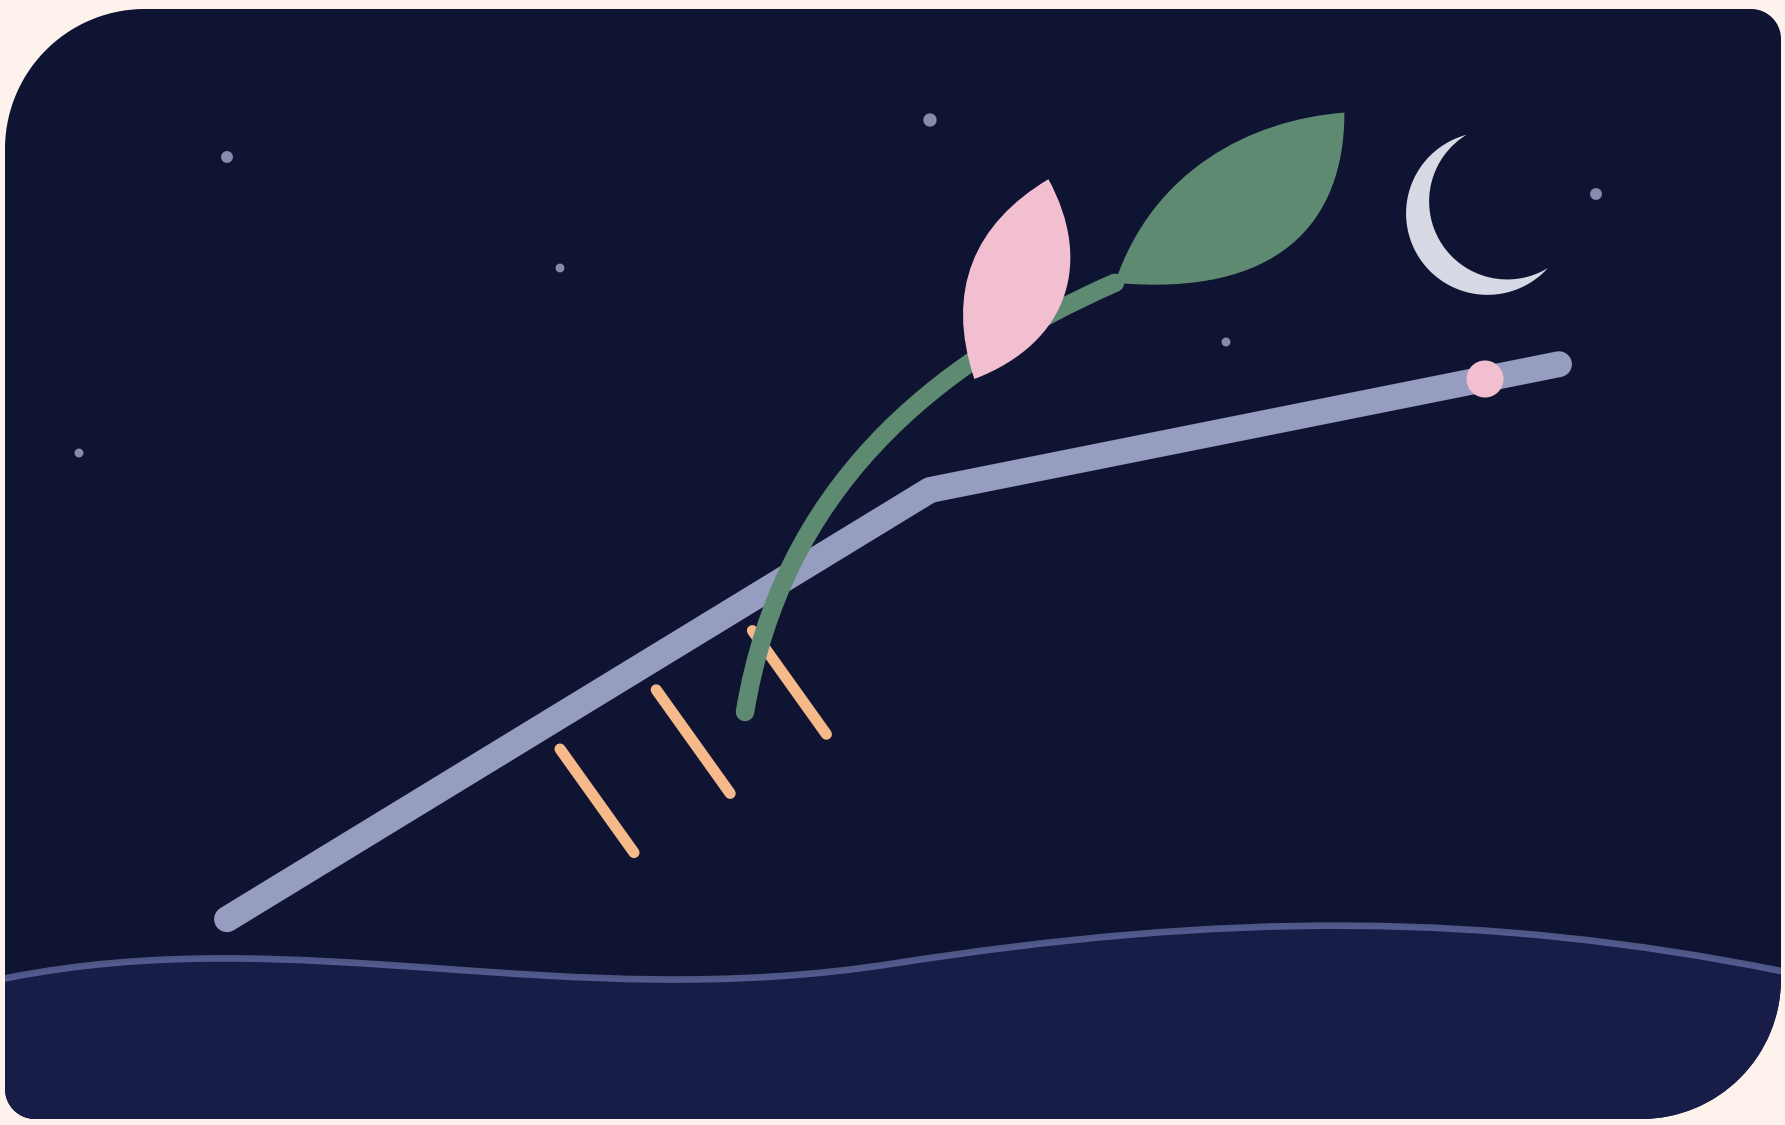

moonbloomlabs.com/services/chatbots-ai-assistants/

Gamification

Game mechanics for learning, onboarding, engagement and financial literacy.

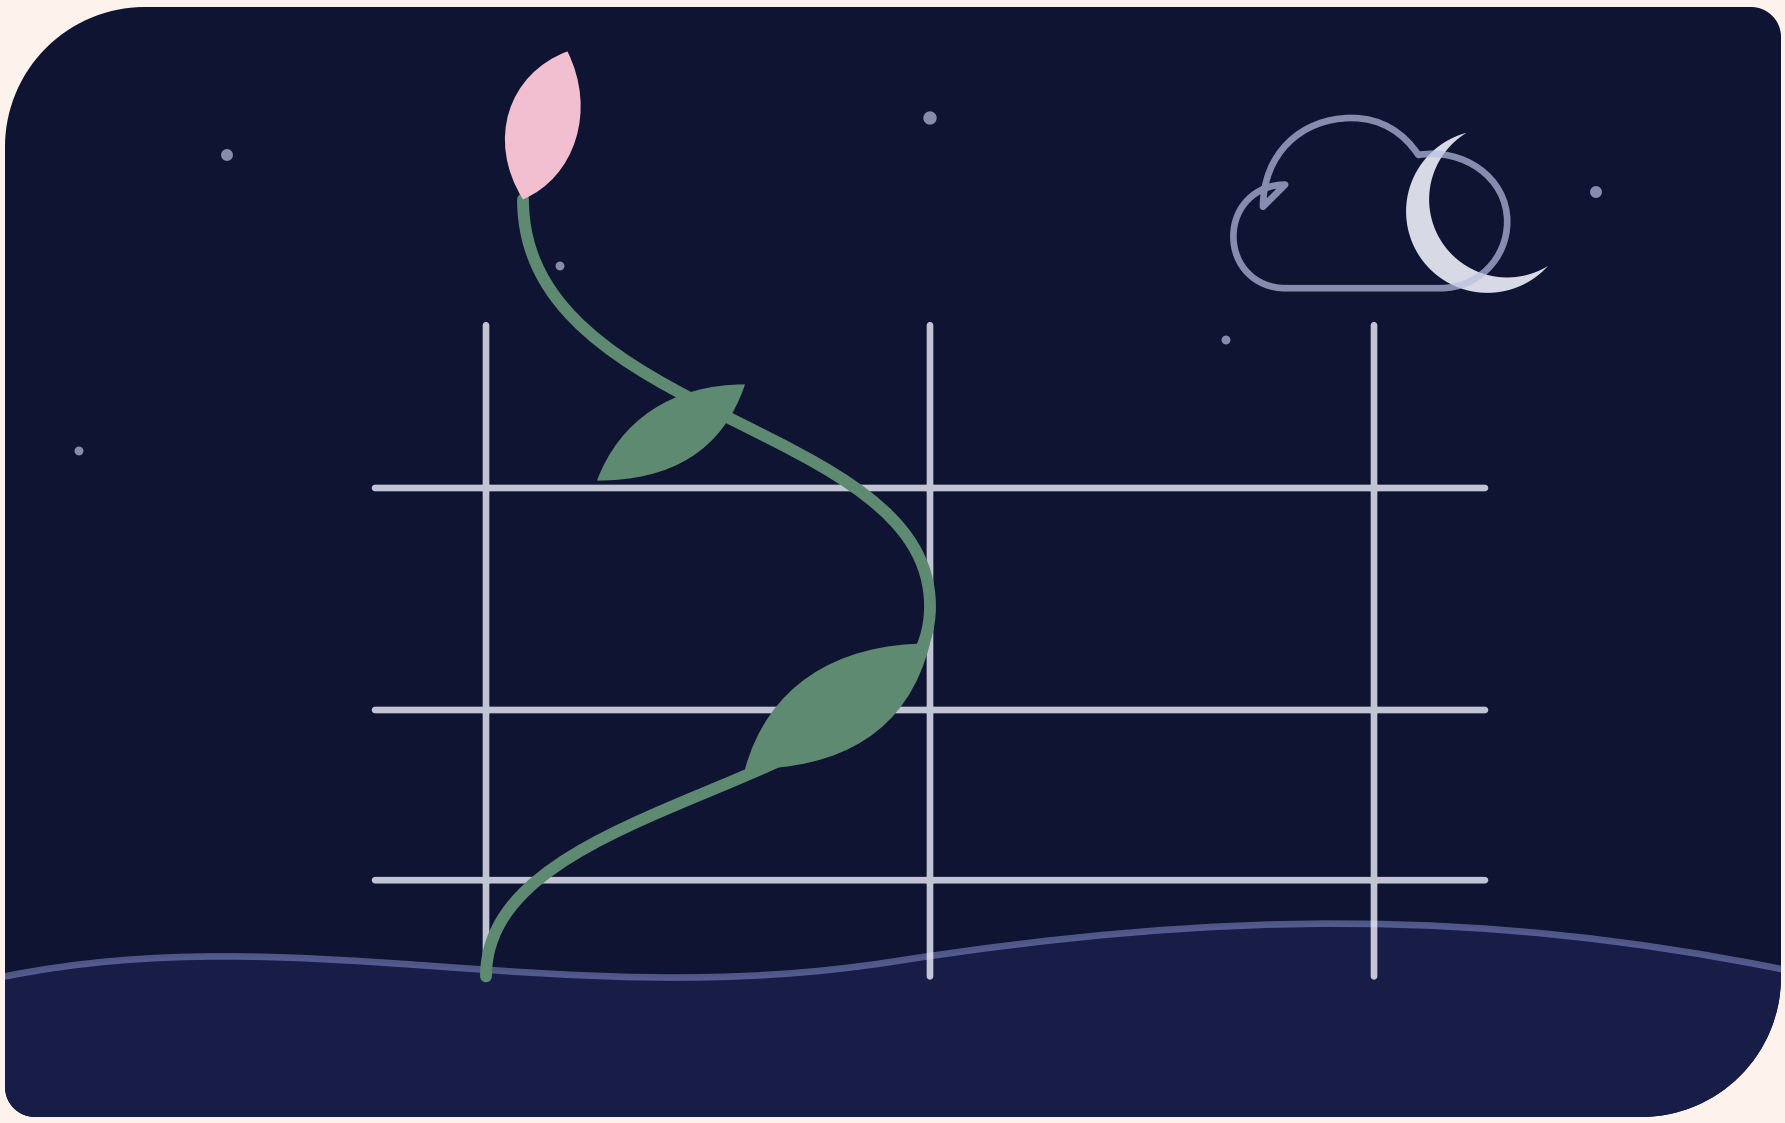

moonbloomlabs.com/services/gamification/

AI integration

Language models and agents connected to your existing systems, APIs and workflows.

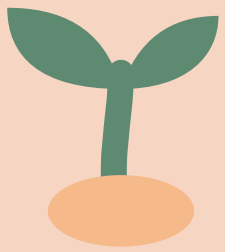

moonbloomlabs.com/services/ai-integration/

DevOps & cloud

CI/CD, Kubernetes, AWS, infrastructure as code and observability, so prototypes can become production systems.
